

LORGUARD® Safety Railing

When lives are at
stake, guard them
with LORGUARD®

About LORGUARD®

LORGUARD® is an innovative rooftop fall protection solution that complies with OSHA requirements 1910.29 and 1926.502 for guardrail systems. Compatible with all commercial roofing materials, LORGUARD® is available in a standard safety yellow, galvanized steel or custom powder-coated finish. Standard sections are 6, 8 and 10 feet long, and custom lengths and colors are available upon request.

Reasons to choose LORGUARD®

 150 MPH wind load rating

 Lightweight design

 Non-penetrating base

 Easy installation

 Custom configuration

 OSHA compliant

 Made in the U.S.

LORGUARD® Base Plates

Protect your people and rooftop with a non-penetrating guardrail system

Designed for easy handling and quick installation, LORGUARD® rail sections do not require attachment to any structure or rooftop penetration. Simply slip the railing section into the innovative, ergonomic base plate and tighten one set screw for reliable rooftop safety.

Base plate features

- Lightweight, 58-lb. base plate minimizes roof load
- Hot dipped galvanized steel plate with non-skid pads
- Carrying handle and radius corners for easier installation
- Set screw design secures railing and eliminates wobble
- Engineered design prevents system overturn

LORGUARD® Accessories and Kits

Base plates

Lightweight, 58-lb. base plates install easily for quicker setup and teardown

Rubber pads

Optional rubber pads add an extra layer of protection between the base plate and roof surface

Safety swing gate

Adjustable, self-closing gate measures 23 inches tall by 23 to 38 inches wide

Kits

Roof hatch, HVAC and contractor kits are available upon request

Toe boards

Create a barrier around the guardrail base to prevent tools from falling off the edge

Your LORGUARD® System

Where to install

- Unprotected roof edges
- Ramps, runways or walkways
- Roof hatches
- Construction sites
- Sky lights
- HVAC systems
- Floor openings
- Ladders
