</table>
| · Powder-coated, anodized high strength alloy  
· Specifically engineered for extra tall and wide applications  
· Enclosed rail to help keep debris out (weather elements)  
· 100% fall arrest rated tie-off from the ground up  
· SAE J429 Grade 8 hardware with zinc yellow Chromate plated finish | · Lightweight design — easily moved by minimal personnel  
· Most allow for positioning by a forklift or other service vehicle  
· Heavy-duty stabilization for use on uneven ground | · Indoor and outdoor use  
· Multiple overhead anchor points on systems that are designed for multiple users  
· Provides a large, safe working area — working radius from rail is 6 feet or 30°  
· Rigid anchor points have no deflection or sag, reducing fall clearance requirements  
· Systems can be permanently mounted (where applicable)  
· Flexiguard™ provides custom solutions to meet the needs of specific and challenging work environments |
Capital Safety’s certified, internally-trained technicians provide industry-leading installation, training services and yearly inspections throughout equipment life to help make your workers’ safety a simple guarantee.

- CONSTRUCTION

With an internal ISO-certified lab, Capital Safety ensures all products are tested and certified to meet and often exceed the latest regulatory standards including compliance with ANSI, CE and OSHA standards. All design, engineering, testing and manufacturing takes place in Red Wing, MN.

*Made in the USA*
**C-Frame System**

The C-Frame System is a versatile fall arrest solution for working at heights. It is designed to be moved manually or with the use of a tow bar and service vehicle, and will require some clearance under the equipment being accessed to accommodate outrigger support legs. These systems are ANSI, OSHA and CE compliant.

**ADDITIONAL C-FRAME OPTIONS:**
- Tow Bar
- 8 in. (0.2m) Urethane Wheel Set
- Grounding Reel
- Lower Synchronizing Kit
- Dual Rail
- Power Lifting Kit
- Removable Outriggers
- Low Profile Kit
- Custom Paint Job
- Tag Line Assist

*For ordering information see page 13*

### FIXED HEIGHT OPTIONS
- Provide effective/economical means of anchoring overhead
- Most often used in areas with no overhead obstructions or door height restrictions
- System includes heavy-duty leveling jacks

A-Frame System

The A-Frame System provides a secure anchor point on a portable structure to give workers increased coverage and protection. Depending on the configuration, this system has the capacity to provide fall protection for up to two workers and can be easily moved from job site to job site, providing safe and reliable fall protection where you need it. These systems are ANSI, OSHA and CE compliant.

**ADDITIONAL A-FRAME OPTIONS:**
- 8 in. (0.2m) Urethane Wheel Set
- Power Lifting Kit
- Custom Paint Job
- Tag Line Assist
- Pull Handle
- Fold-Out Outriggers
- Tow Bar

For ordering information see page 13

Counterweight Jib

The Counterweighted Jib is a portable solution for indoor and outdoor maintenance where mobility and worker safety are key. These systems incorporate a 360° rotating jib with the capacity to provide fall protection for one person. Forklift pockets are strategically located on all four sides of the base to ensure ease of mobility and placement from job site to job site. The base also contains four heavy-duty lifting rings for transport by a crane. These systems are ANSI and OSHA compliant.

ADDITIONAL COUNTERWEIGHT JIB OPTIONS:
• Winch Rescue Kit
• Jack Mounts For Leveling
• Custom Paint Job
• Low Profile Kit

Freestanding Ladder System

Each Freestanding Ladder System combines easy access to elevated work areas with 100% fall protection for up to two users from the ground up for the duration of the work being performed. System configurations include guardrails and the use of multiple SRLs on the system. These models are ANSI, OSHA and CE compliant.

ADDITIONAL FREESTANDING LADDER OPTIONS:
- 8 in. (0.2m) Urethane Wheel Set
- Custom Paint Job
- Grounding Reel
- Low Profile Kit
- Tow Bar

For ordering information see page 13
Supported Ladder System

The Supported Ladder System is a portable system specifically designed for the safe access and maintenance of transportation vehicles in a variety of different applications and environments. This unique solution offers the best in passive and active fall protection. The work platform is fully enclosed by guardrails for superior passive fall protection and easily accessible through two spring loaded swing gates. The working surface of the vehicle is accessed through one spring loaded gate while the user is tied off to the active fall arrest rail. This system is ANSI and OSHA compliant.

SUPPORTED LADDER SYSTEM OPTIONS:
- Custom Paint Job

For ordering information see page 13

SUPPORTED LADDER SYSTEM OPTIONS
- Heavy-duty steel base design with an aluminum platform and fall arrest rail
- Work platform will be covered in a non-slip material
- System equipped with two heavy-duty stabilizing jacks and two retracting outriggers that can be set without having to go beneath the work surface

Sky Anchor

The Sky Anchor solutions provide a secure anchorage point, giving the worker increased coverage and protection while working at heights. All systems are rated for one person use and provide 360° mobility within the safe working radius from the anchor point. All available systems incorporate a collapsible design for easy setup, as well as a variety of bases for securing the system onto any job site. These systems are ANSI and OSHA compliant.

**SKY ANCHOR OPTIONS:**
- Winch Rescue Kit
- Custom Paint Job
- Base Cap

For ordering information see page 13

**SKY ANCHOR OPTIONS**
- Lightweight aluminum construction
- Collapsible design
- 360 degree mast rotation
- 6 ft. (1.8m) safe working radius from anchor

Counterweighted System

The Counterweighted System is designed as a portable solution to provide an overhead anchor point for multiple users while working at heights. These systems are designed to be counterbalanced by concrete or other means, allowing for close positioning to the work surface without obstructing the equipment being accessed. These systems are ANSI and OSHA compliant.

ADDITIONAL COUNTERWEIGHT SYSTEM OPTIONS:

• Custom Paint Job

For ordering information see page 13

COUNTERWEIGHTED SYSTEM OPTIONS

• Provide effective/economical means of anchoring overhead
• Includes systems with and without the concrete counterweight on base of unit
• Ideal in areas with no overhead obstructions and door height restrictions
• 8530349 is an advanced hybrid counterweight system that includes an adjustable ladder system and counterweight
• System includes heavy-duty leveling jacks and tag line assist

The Box Frame System provides a convenient means of securing a fall arrest rigid rail in areas with limited space or inadequate overhead structure. These frames are built to accommodate a specific area or piece of equipment. These units can be designed as permanent or portable frames, allowing for ease of relocation. These systems are ANSI and OSHA compliant.

**ADDITIONAL BOX FRAME OPTIONS:**

- Custom Paint Job
- No Wheel Kit
- Tow Bar
- Fixed Ladder Kit
- Power Lifting Kit

Hitch Mount Anchor System

The Hitch Mounted Anchor System is a portable system originally designed to access and maintain heavy mining equipment. The unique design of this system allows it to attach to a class three hitch for transport on a truck or service vehicle. Assembled in less than 20 minutes, this system provides anchorage points up to 22 feet tall. It is rated for a maximum of two users and is ANSI and OSHA compliant.

**8 IN. (0.2M) URETHANE WHEEL SET**
- Designed for low speed
- Heavy-duty bearings for smooth level travel
- Ideal for concrete or asphalt surfaces

**CUSTOM PAINT JOB**
- End user color preference

**DUAL RAIL**
- Allows for bypassing trolleys, two users working simultaneously

**LOW PROFILE BASE KIT**
- Allows for access in space constraint areas
- Available for Counterweight Jib systems

**POWER LIFTING KIT**
- Hydraulic operation, assist in raising and lowering the system

**LOW PROFILE KIT**
- Allows for access in space constraint areas
- Provides smaller diameter wheels for access into tight areas
- Available for C-Frame systems

**FOLD-OUT OUTRIGGERS**
- Used to stabilize the system while stationary
- Available for A-Frame systems

**GROUNDING REEL**
- Used to ground a system in an electrically hazardous area

**JACK MOUNTS FOR LEVELING**
- Used for leveling the system on uneven surfaces
- Available for Counterweight Jib systems

**LOWER SYNCHRONIZING KIT**
- Designed for use in the aerospace industry — allows system to be used in low wing aircraft applications
- Available to Height Adjustable C-Frame systems

**NO WHEEL KIT**
- Allows for a permanent, non-portable base
- Available for Box Frame systems

**PULL HANDLE**
- Allows for moving the system into place
- Removable for storage
- Available for A-Frame systems

**REMOVABLE OUTRIGGERS**
- Allows for a modular, low profile wheel assembly for space constraint areas and storage
- Available for C-Frame systems

**TAG LINE ASSIST**
- Rope assembly attached to an SRL for easy access

**TOW BAR**
- Allows for towing behind a service vehicle
- Removable for storage

**WINCH RESCUE KIT**
- Heavy-duty winch assembly that attaches to the system
- Available for use on Counterweight Jib and Sky Anchor systems

**BASE CAP**
- Specifically used with Sky Anchor Base 8530162

**FIXED LADDER KIT**
- Fixed ladder assemblies for quick accessibility
- Available for Box Frame systems

INNOVATION THAT BRINGS WORKERS AT HEIGHT HOME SAFELY.

Capital Safety is a global company solely dedicated to fall protection and rescue. Our focus is clear. It continually drives us to design and manufacture safer gear that workers want to wear.

Innovation means understanding the industries we serve. We listen to the workers in the field, employ the most engineers, customize solutions, register more new patents and introduce more products. To date, Capital Safety has the best quality and largest breadth of products in the industry.

But we’re more than a product company.

We take an innovative approach in bringing our products to the field. We have created international partnerships and a vast network of certified installers and service centers.

We offer on-site and in-house training. And we’re ISO 9001-2000 certified for customer service, as well as manufacturing and engineering.

Capital Safety is one of the world’s leading manufacturers in fall protection and rescue equipment, with decades of experience and a legacy of innovation.

Look for complete solutions in our extensive line of DBI-SALA® and Protecta® products.
