Protect Your Roof and Personnel With Non-Penetrating Guard Rail Systems & Solutions
LORGUARD™ GUARD RAIL
A versatile and affordable fall protection option

Lorguard™ is a utility safety product that complies with OSHA requirements 1910.29 and 1926.502 for guard rail systems. Lorguard™ is a free-standing, non-penetrating system that does not require attachment to any structure in approved applications.

Compatible with all commercial roofing materials, Lorguard™ is available in standard power-coated safety yellow and galvanized steel in 6’, 8’, and 10’ sections. Custom lengths and colors are available upon request.

Lorguard™ Base Plate Features
» Light weight, 58 lb. base plate reduces installation time and minimizes roof load
» Hot dipped galvanized steel plate with non-skid pads
» Carrying handle and radius corners
» Set screw design secures railing and eliminates railing wobble
» Engineered design prevents system overturn

Reasons to Choose Lorguard™ Railing Sections
» No surface attachment or roof penetrations required
» Fast installation—insert railing into receiver and tighten set screw
» Minimal 1-3/16” gap between sections
» Durable, UV resistant finish
» Made in USA
Applications
» Unprotected Roof Edges
» Ramps, Runways, or Walkways
» Roof Hatches
» Construction Sites
» Sky Lights
» HVAC Systems
» Floor Openings
» Ladders
» Wells, Pits, Shafts or Manholes

Compatible With All Roofing Materials
» Membrane   » Standing Seam
» Gravel      » Tar
» EPDM
# Lorguard™ Accessories and Kits
